

3Shape Clear Aligner Studio

The Clear Advantage

The innovative all-in-one clear aligner **software solution** that unlocks new possibilities for your lab

Unlock new possibilities for your lab with 3Shape Clear Aligner Studio

Enhance your business with more control and efficiency than ever before by adding clear aligners to your product offering with 3Shape Clear Aligner Studio. Clear Aligner Studio is the fast and easy way to bring clear aligners into your lab's production workflow.

You asked. We listened.

3Shape developed Clear Aligner Studio by engaging with users like you and creating the features that you've been requesting. Features like a simplified end-to-end workflow, more control over your cases and increased design efficiency.

Let's change dentistry together

3shape

Give your lab the clear advantage

One integrated workflow

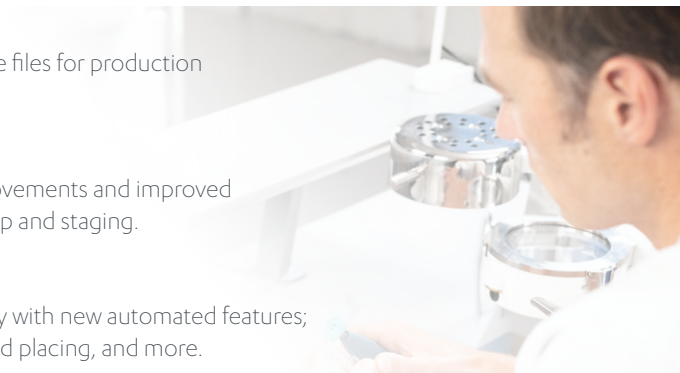

Quickly scan, design and prepare files for production using one integrated workflow.

Full treatment control

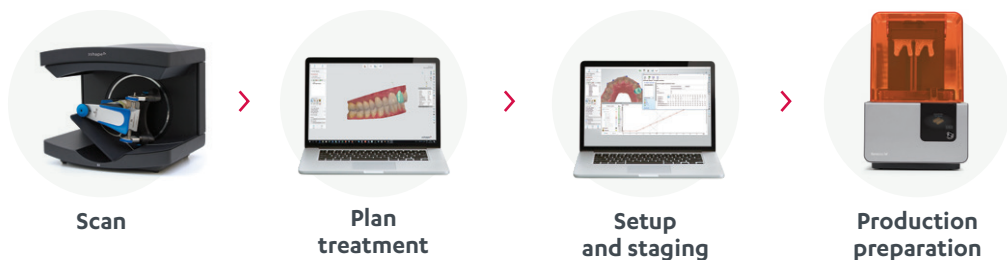

Get more control over tooth movements and improved visualization with enhanced setup and staging.

Increased efficiency

Save time and increase efficiency with new automated features; ID tagging, attachment sizing and placing, and more.

3Shape Clear Aligner Studio's intuitive workflow

Get more open options

Use expert design service partners for the setup and staging, or outsource the production to 3Shape manufacturing partners. Whatever your lab's level of design experience or capacity, the workflow can be tailored to suit your needs, with the option to outsource the setup and staging.
